INTAN JAUHAR SDN BHD (IJSB) is a specialize in a range of project management and business solution, providing professional services in various areas, including Construction, Engineering, Maintenance Services, Information and Telecommunication Technology Services. It comprises a group of experienced professionals who previously served as project consultants.

Our existing clientele spans from public-listed corporations, multi-nationals, government entities and SMEs in a wide spectrum of industries. At the core of IJSB' s philosophy is a strong belief intended to provide solutions which are both customized and distinguishable for each of our very individual clients. IJSB is in place to assist all such corporations in attaining their objectives, be it at a strategic or operational level, or even both where operations are ensured to properly support long-term strategy and objectives.

OUR VISION

INTAN JAUHAR SDN BHD (IJSB) aspires to be a highly reputable Malaysian Construction, Engineering, Information and Telecommunication Technology Services company with excellence as our hallmark. We guarantee our clients by supporting our customer's business objectives and cost efficiency.

We are committed to sustainable and environmentally friendly project management methodology whilst always fulfilling our responsibilities towards communities and society at large. We emphasize on after sales service to win repeat order from our clients.

OUR MISSION

INTAN JAUHAR SDN BHD (IJSB) is committed to utilising and harnessing Mother Nature's readily available resourceful in environmentally responsible ideas, strategies, systems, products and materials, and are versatile in terms of construction and engineering solutions with architectural excellence.

As a premier Construction, Civil Engineering and Information and Telecommunication Technology Services company, IJSB registered with the Construction Industry Development Board (CIDB) G7 Classification contractor with Bumiputera status. We are also registered with Ministry of Finance (MOF) with Bumiputera status and registered with PETRONAS. We take pride in possessing a proven track record in small to large scale construction projects ranging from high-end residential development projects to several prestigious government projects.

Our primary strength lies in our cohesive human resource armed with extensive experience and teamwork spirit.

OUR PHILOSOPHY

Our philosophy is to acquire greater knowledge and stronger organizational abilities, as well as to create new value, by actively employing leading-edge information technologies and providing optimal solutions. We shall strive to gain the trust of everyone with whom we have a relationship, including our clients and shareholders, and contribute to the realization of a rich, sustainable society.

INTAN JAUHAR SDN BHD (IJSB) possesses capacity and capability in providing wide range of services to meet the needs of our clients. At IJSB, we pride ourselves on being an organization of world-class teams, driven by an entrepreneurial spirit and dedicated to serving our clients. Our strategic vision is to be the leading integrated solutions provider for turn-key project management, setting the benchmark for the industry. We excel in assisting corporate and private companies in various sectors, including Development & Construction, Oil & Gas Engineering, Satellite Telecommunication, ICT Solution, Defence Technology, Vessel Management, Satellite Image, Geospatial Technology, Voluntary Carbon Market and General Trading. Our goal is to provide cost-effective solutions with maximum impact, showcasing our unique potential.

For more than 2 decade, we have been turning our clients' visions into extraordinary realities, achieving what may have seemed impossible. Our unmatched depth of experience and resilience have propelled us to the forefront of the industry, earning us a reputation as celebrated leaders.

When you choose IJSB, you gain more than just a construction partner – you gain an extension of your own team. We are committed to discovering the best solutions tailored to your objectives and budgets, delivering from the initial concept to vital execution. Our outstanding reputation and unparalleled achievements are a testament to our organized and revolutionary thinking, always prioritizing personalized attention and exceeding client expectations. Customer satisfaction has been our driving force since our inception in 2008.

With an unwavering focus on staying ahead of the latest trends and integrated business solutions, we understand the importance of realizing your ideas down to the smallest detail. Ethical conduct is woven throughout our organization, ensuring that every aspect of our operations upholds the highest standards. Our laser-sharp focus, unmatched professionalism, and commitment to providing first-class service guarantee the utmost success of your project. We are the support you need – the anchor to your success.

Our wide range of industries and business invariably consumes vast amounts of raw materials, energy, plants, technology and equipment. Our customers rely on us to deliver quality products and services on time - every time at reasonable cost. To this end, people is our prime factor. Thus we invest substantially every year in training programmes, health and safety management and career development for our personnel across the board.

In addition to formal courses and on the job training, we place strong emphasis in maintaining close communication with our employees and their families through social events. We emphasize on a quality assurance plan in place our entire business operation. Also, we invest and utilize electronic automation and office communication process to ensure that we serve our clients responsively and responsibly.

01 Construction & Civil Engineering

Our people bring their technical knowledge, experience, and resourcefulness to the construction services delivery of all sizes and levels of complexity – from intricate interior renovations to some of the most complex civil operations in the country, we can build it all. VFive's breadth of capabilities ensures that we are able to meet our clients' needs every time, on every front.

But, more than our extensive portfolio, what truly sets us apart is our people. Their dedication to providing world-class service to our clients, resolve for delivering exceptional work, capacity for innovation and problem solving, and unwavering commitment to improving the communities we serve, make IJSB what it is today.

02 Oil & Gas Engineering & Supply

IJSB offers solutions for various needs, from the supply of fabricated material to the management of projects. Our careful and reliable choices are always designed to meet our customers' exact needs. Our innovative spirit is reflected in every job that we undertake. Our simple yet organized structure means the right people are always easily accessible to our clients.

IJSB offers complete solutions for the Oil & Gas Industries starting from design and detailed engineering to procurement, fabrication, and construction and commissioning of bulk and process plants. The various departments work in complete harmony and synchronization to produce a final product that is safe, reliable, and effective.

03 Satellite Telecommunication Services

Satellite has been evolved rapidly from last 10 years. The previous concept of huge satellite can provide a better services has been long gone. Taking this opportunity IJSB, has taken one step ahead and already started to collaborate with partners in Malaysia and Overseas to exploit the CubeSAT satellite class to the fullest.

IJSB is now promoting 12U CubeSAT as the core satellite for electro-optical satellite. The payload has the capability of providing Ground Sample Distance of 2m thus elevating the company as the high resolution data provider to the market. Company main focus is to provide the market with an images at the most reasonable possible within the best stipulated time frame.

04 ICT Solutions Provider

IJSB is focusing on providing business process outsourcing (BPO) solutions to its customers. Having worked in wireless operations IJSB team members apply objective competence and industry standard tools to mission-critical projects, provide end to end outsourcing solutions and deliver unparalleled services. The team can effectively manage the lifecycle of every project to ensure that client needs are successfully met.

IJSB has the capability and expertise to provide different telecom services for operators and vendors. Our services range from network inspection to vendor management understanding very well that a well maintained network will require less corrective maintenance and will be easier and more reliable to operate.

05 Vessel Management System

We provide data intelligence processing, treatment and dissemination into the market. The acquired data from multi satellites with varies specification to be geotagged and mosaicking to the highest level of data. We are also fully optimized the images through utilization of the metadata files provided by respective satellites or data provider. Through our owned development of algorithm (hybrid data correction between space & airborne filtering), we are providing the best, fully enhanced imageries for any applications and any data users worldwide.

06 Defence Technology

IJSB helps customers improve competitiveness by optimizing supply chains and driving innovation in the design, engineering and after-sales support of mission-critical applications.

We work with commercial aerospace leaders in most segments of the industry, from aircraft OEMs to satellite and space transportation firms. We partner with these organizations to help them improve operations, program affordability, and growth. Our solutions combine advanced technology, proprietary data, and deep subject-matter expertise to deliver impact to our clients quicker than ever—and sustain it for the long term.

07 Cyber Intelligence

Artificial intelligence (AI) is enabling cyber-criminals to generate highly personalised and unique attacks at scale. Meanwhile, cyber defense is playing catch up, relying on historical attack data to spot threats when they reoccur. But when novel attacks are the new normal, this approach is no longer enough. Our product suite is underpinned by our unique Self-Learning Cyber AI. Rather than learn from previously encountered attacks, our unique Self-Learning AI takes a different approach. It understands your organization, learning from every user and device, and the connections between them. This means it can reveal subtle deviations that point to a cyber-threat – even one augmented by AI, using tools and techniques that have never been seen before. Our level of expertise covers;

Prevent

Empowers security teams to reduce cyber risk by prioritizing vulnerabilities and hardening defenses proactively.

Detect

Delivers instant visibility of known and novel threats, powered by a continuously evolving understanding of your business.

Respond

Acts autonomously to interrupt cyber-attacks with precise and targeted actions, without disrupting regular business operations.

Recovery

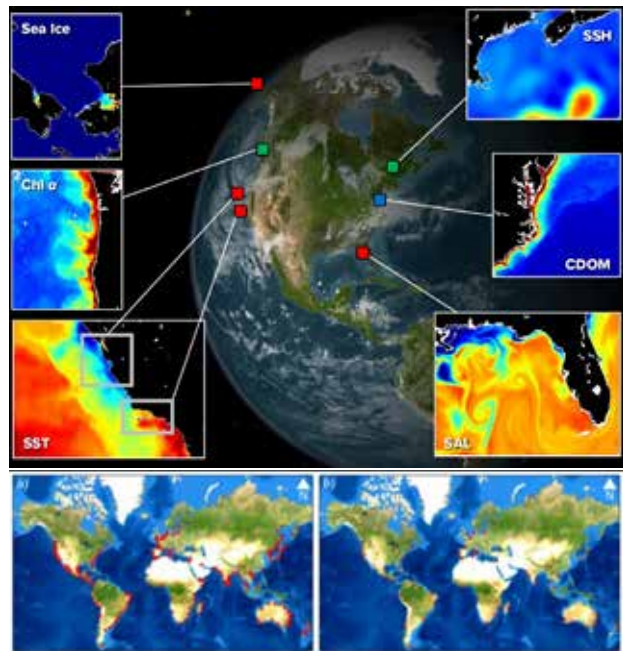

Automates incident recovery processes, allowing organizations to return systems to a trusted operational state in the event of a cyber-attack.

08 Satellite's Intelligence

As technology becomes more complex, managing security environments is becoming increasingly challenging, especially for government authorities involved in the surveillance of communications traffic across various satellite networks. Our SkyMon is the satellite carrier monitoring and interference localization solution that lets you identify interference and manage carriers in one comprehensive system while minimizing your investments. Its modular architecture can be customized to integrate with your existing infrastructure.

Our solution covers 3 networks; Thuraya, Isat, Iridium with SDR-based solution.

Satellites monitored Thuraya 7 spot beams, 1 satellite at a time
 Inmarsat 7 spot beams, 1 satellite at a time
 Iridium 10 satellites with each with 5+ spots.
 (Depending on antenna configurations)

Concurrent Calls 100 Simplex calls and 50 Simultaneous Duplex calls in total

Intercepted Data IMEI, IMSI, TMSI*, GPS location, Audio, SMS, SBD, FAX, Telephone Numbers

This technology are the future options for GlobalStar and Snapdragon with NATO Approved Devices.

Ground Control Station

- Integrated UAV Control
- Flight Path Planning
- Flight Boundaries
- Flight Parameters
- Scanning Area
- Data Storage

09 Geospatial Intelligence

We provide a complete spectrum of geospatial and technology driven solutions customizable to both public and private sector clients. Our consultancy services include geospatial operation, geospatial information and management, system development and marine services – which are essential to planning the what, when, and why at where.

We can offer customized solutions in the following:

- Geospatial Operation
- Geospatial Information and Management
- System Development
- Marine Services

Precision Location Data

Geospatial Intelligence (GEOINT) will allow applications to provide better services by analyzing the precise locations of billions of mobile phone users in every part of the planet. Precision location data also applies to vehicles, ATM transaction locations and online activities.

Remotely Sensed Information

GEOINT / GIS analysis of high-resolution imaging from space will become more accessible for any enterprise with the advent of reusable, commercial rockets and smaller, less expensive satellites. Unmanned aerial vehicles will also provide imaging for everyone from agriculturalists to disaster response personnel.

Processing Power

The potential of GEOINT-related data will only grow with the increase of high-power computing. This will facilitate large-scale crowdsourcing of imagery. For example, crowdsourced “crisis mapping” of humanitarian relief efforts for natural or manmade disasters.

Data Analytics

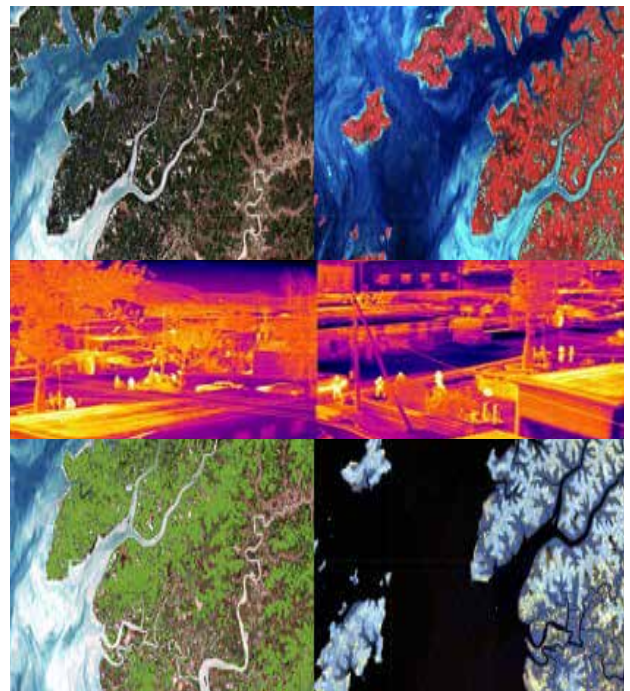

GEOINT will benefit from and contribute to advances in data and predictive analytics in fields like health care, telecommunications, utilities, banking and insurance.

Virtual and Augmented Reality

GEOINT data is essential to accurately model real locations in gaming, virtual reality and augmented reality environments.

The Internet of Things

GEOINT will facilitate greater understanding of the live-streaming of data from every product people use.

10

Open-Source Intelligence

AI technology automatically identifies sensitive Open-Source Intelligence (OSINT) that needs to be alerted and notifies users at the minute level. Generating real-time OSINT. The best way to manage a negative public relations incident or negative viral social media activity is to be prepared by planning ahead. We provide solution responsible for the collection, analysis, and exploitation of information in support of law enforcement, national security, military, and foreign policy objectives. Key challenge for OSINT implementation;

Business Challenges

- Demand for economic intelligence
- Transnational organized crime
- The global war on terrorism

Technical Challenges

- The expansion of social media
- The expansion of cybersecurity issues
- The use of cryptocurrencies and dark web

System Challenges

- Need a more efficient collection and analysis
- Need innovative ways to handle the explosion in the volume, velocity, and variety of data

Our OSINT solution covers for Intelligence Agency, Counterterrorism, Homeland Security, Criminal Investigation, Lawful Interception and Digital Forensics.

11

Signal Intelligence

Signal Intelligence (SIGINT) provide solution for interception and collection of information from various electronic signals. It is an essential tool used by many organizations, most notably the military, to better understand their opponents' activities and intentions. The collection of signals and communication-related information is used to gain insight into the workings of an adversary or target. SIGINT uses various methods, such as;

- Listening to radio waves
- Monitoring satellite communications
- Decoding encrypted messages
- Intercepting telephone conversations
- Analyzing open-source data

To obtain this kind of information, intelligence agencies may employ electronic means, including satellites, aircraft with special equipment, bugging devices, and interception of fiber optic cables. All data collected through SIGINT can be used for counterintelligence purposes by determining the capabilities and intentions of a foreign power or other adversaries.

**Analysis view**

- Explorative investigations using drill-down filtering
- Data enrichment (languages, geo IP, user-actions)
- Pattern visualization
- Relationship- & network diagrams

Multidimensional Drill-down

- Combination of filters from numerous dimensions
- Interactive timeline
- Text filter
- Navigators

Investigation view

- Sequential workflow based on cases and taps
- Customizable event-list
- Supports different workflows

12

Border Monitoring

A persistent data stream and a constant overview of the situation and operations at the borders will detect and react to activities quickly and effectively, and even predict future events to ensure national security. Border enforcement agency need to detect any unexpected actions near the borders and in the wider area, including the concentration of vehicles and equipment clock even in inaccessible areas.

Through our experience in Satellite, Drone, and Geospatial Technologies we are able to provide solution for detailed, high-revisit, and comprehensive monitoring that can cover vast areas along the borders daily or even sub-daily. One of our unique capabilities is to collect high-resolution images even at night, through clouds, rain, fog, and smoke.

Daily Coherent Ground Track Repeat imagery helps you identify the smallest changes happening between image acquisitions. You can see millimeter-level ground changes not visible to the human eye, caused by vehicle traffic or other activity on a gravel road, grass, or in a desert. Obtaining this level of information every 24 hours. Our solution focus on site activity monitoring, port monitoring, oil spills, deforestation monitoring and maritime domain awareness.

Unequaled Visibility

Get high-resolution visibility into any location, day, or night, through clouds and darkness with the world's most advanced SAR satellite imaging.

Forensic-level Detection

Image your location of interest daily and detect changes at an accuracy level.

Actionable Intelligence

Stay alert with accurate data on changes at or beyond your borders. React to any activities that affect national security and infrastructure safety.

Flexible Monitoring

Monitor your borders according to your needs. Get a single image of an area of up to 50,000 km² or zoom in to areas down to less than a meter.

Timely Delivery

Get data delivery 8 hours from image acquisition as a standard. For urgent requests, data delivery is possible in as little as a few hours.

Trusted Partner

Long track record of serving the world's most demanding national security needs. Reliable data from a reliable partner.

13

Voluntary Carbon Market

Carbon offsetting is a strategy for reducing the overall carbon emissions of an organization or individual, often via carbon credits. A single carbon credit is represented by one ton of carbon dioxide or its equivalent that is not emitted as planned or that is removed from the atmosphere. An organization that reduces or removes emissions may sell the carbon credits they accumulate to buyers who are attempting to become net-zero or carbon neutral but are unable to eliminate excess emissions due to cost or technology limitations.

Through our experience in Satellite Technologies, Drone Technologies, Geospatial and Biodiversity field work, we have take-off for a new journey in Voluntary Carbon Market. We have been appointed by Blue Carbon Securities, United Kingdom as Smart Partner in Malaysia. Our focus now on the Blue Carbon.

PETRONAS (License)

LICENSE TO SUPPLY PRODUCT/SERVICE TO EXPLORATION AND OIL/GAS COMPANIES IN MALAYSIA

In exercising the powers conferred by Section 7, Petroleum Development Act 1974 and in accordance to Regulation 5 of the Petroleum Regulation 1974, delegated to me by the Prime Minister of Malaysia, I hereby issue the license under Regulation 3 of the Petroleum Regulation for the purpose of the above to:

Certificate generated at: 16.06.2024

INTAN JAUHAR SDN. BHD., (200801039553)
NO. 42-1A BLOK 8 JALAN PAHAT H 15/H,KOMPLEKS OTOMOBIL PERSIARAN SELANGOR,SEKSYEN 15,40200 SHAH ALAM,SELANGOR.

Details of License are as follows:

Company's No	: 200801039553
Type of Company	: License
Duration of License	: 22.03.2024 - 17.05.2027
License Fee	: RM 750.00
Categories of Product/Service	: As attached in 'CATEGORIES OF LICENSE / REGISTRATION'.

Special Conditions impose onto this license:-

Subject to the special conditions as attached.

General requirements of this License are as stated in the next page.

Reminder: License Must Apply For Renewal 4 Months Before The Expiry Date.

PETRONAS LICENSE GENERAL CONDITIONS

1. Company is required to register, obtain a license, permit or authorization from the relevant authority to carry out the services or supply of product or material used in company's operation and activities;
2. This license is not transferable to any company/other party;
3. This license will be revoked if the company is found to be in the process of liquidation, winding-up or dissolution;
4. Company shall inform PETRONAS on any changes related to company's position such as equity ownership, board of directors and management staff within **fourteen (14) days**. Failure to do so can result in revoke of License;
5. Company should take immediate action to adhere to the special conditions imposed as stated in the appendix of the PETRONAS license certificate and to inform PETRONAS on the progress of this action;
6. Company is not allowed to take another company as principal, agent, sub-contractor or otherwise to provide any service or supply of any facility, fittings or equipment on its behalf without prior written consent from PETRONAS;
7. Company shall allow PETRONAS representatives for inspection visit / site / company audit and review / copy of documents and interviewing employees and related parties;
- f. Sub-contract work to another contractor without written permission from PETRONAS.
- g. Reject any contract or tender awarded.
- h. Entering or accepting contract or tender during the license suspension period.
- i. Provide false, inaccurate or misleading information.
- j. Does not follow tender's regulations and ethics including but not only limited to sending poison-pen letters, bribing or lobbying.
- k. Engaged in any inappropriate activities with this License.
11. According to Act 9, Petroleum Acts 1974, a person who initiate or continue any business or continue providing services as mentioned in Act 3 without a license or do not comply with any condition of the license is committing a crime and can be fined not exceeding RM50,000.00 (Fifty Thousand Ringgit) or imprisonment for a period not more than two (2) years or both and in respect of each continuous crime, it is subject to further fine of RM1,000.00 (One Thousand Ringgit) for every one (1) day or any part of one (1) day which the offense continues after the first conviction is recorded;
12. This approval is not an agreement/guarantee that your company will be called to participate in a tender or quotation of PETRONAS or its subsidiaries;

PETRONAS (License)

8. This License must be shown to PETRONAS's officers when it is required for inspection;
9. This License is only valid for services and supply of products as stated in the appendix of the PETRONAS license certificate;
10. This company can be penalised if in PETRONAS' opinion, it has conducted one or more of the following:
- a. Failed to execute the award job until completion.
 - b. Failed to perform a contractual obligation or any other obligation under the law to partners, principals, agents, sub-contractors and others.
 - c. Received garnishee order.
 - d. Facing bankruptcy action.
 - e. Cannot be traced through the last address.
13. The company either by itself, through its employees, directors, agents or its employees;
- a. Not allow to use the logo of the PETRONAS's oil drop or the word "PETRONAS" or use any mark, logo or words or wearing typeface, font, which resembles the appearance or colour trademarks owned or used by PETRONAS or its subsidiaries ("the PETRONAS trademarks") in any form whether in printing materials, websites or hand board; and
 - b. Not allow to perform any act or in any way either directly or indirectly admits that it is a partner or have any connection/relationship with PETRONAS and/or its subsidiaries, UNLESS AND EXCEPT company is allowed to use reference [Company] is licensed by PETRONAS [No. license], under Act 3 Petroleum Act 1974.
14. This License may be revoked, suspended or blacklisted at any time if any of the above conditions, general conditions of PETRONAS license and registration and any other conditions set in PETRONAS License and Registration General Guidelines are not fulfilled.
